- **Why Málaga? – Work where others go on holiday!**

On the beautiful *Costa del Sol*, the coast of the sun, lies the port city of Málaga. With an average of 3000 hours of sunshine per year it fully deserves this name. Those who have already been to Spain will soon notice that Andalusia is different from northern Spain or Catalonia, Castile or Madrid. Málaga it is more relaxed and at the same time more lively than many other big cities: The small streets and squares that invite you to stroll and linger, the narrow historic houses or the white villages shining in the sun - Málaga has a charm that is second to none. And miles of sandy beaches offer variety and coolness during the summer months...
